

(a) Query and target video

VI ...một người chụp ảnh graffiti
ba chú khỉ trên một cây cầu.

EN A person photographs graffiti of
three monkeys on a bridge.

KF 206

KF 208

Target video L22_V010

score 0.11438 • rank 3 / 873

REAL DEVELOPMENT EXAMPLE

(b) Window selection

Text encoder

Image encoder

score each sliding window

one window = 16 keyframes

$w_1: 1-16 \rightarrow w_2: 2-17 \rightarrow \dots$

For each candidate interval A:

$F(A) = \max \text{ score over windows not overlapping A}$

choose KF 195–210 • $F = 0.03867$

(c) Attack and reranking

Selected 16 keyframes

KF 195–210

PGD pixel attack

15 steps • $\epsilon = 8/255$

Re-encode target windows

final score = 0.03872

Rank against 873 videos

3 → 137

same perturbation budget for every selector
